PROFESSIONAL SUMMARY

Data Analyst with an MSc in Information Technology and hands-on experience in Python, SQL, and Power BI. Skilled in data cleaning, exploratory data analysis (EDA), statistical analysis, and **dashboard development, KPI reporting, and business intelligence**. Experienced in working with large datasets (400K+ records) to generate actionable insights and improve decision-making. Familiar with **ETL processes** and **data pipelines**, with a strong foundation in data visualization, hypothesis testing, and machine learning fundamentals.

EDUCATION

Master of Science (MSc) – Information Technology

Islamic University of Science and Technology, Kashmir 2023 – 2025

Relevant Coursework:

Data Analytics, Big Data Analytics, DBMS, Statistical Methods, Quantitative Techniques, Python, Machine Learning, Computer Networks

Bachelor of Science (Non-Medical)

Cluster University of Srinagar (Sri Pratap College) - 2020 – 2023

Relevant Coursework:

C, C++, Java, Database Management Systems

EXPERIENCE

Data Analytics Intern – 360DigiTMG

- Worked on **Medical Inventory Optimization project**
- Performed data cleaning, analysis, and visualization using Python and Excel
- Assisted in building insights for inventory and procurement decisions

PROJECT EXPERIENCE

Customer Revenue & Retention Analysis

- Analyzed **400,000+ retail transactions** using Python and SQL to identify churn patterns and revenue leakage
- Performed **RFM segmentation**, improving customer targeting strategy
- Conducted **statistical hypothesis testing (T-tests)** for validation
- Built a **Power BI dashboard** to monitor KPIs and customer behavior trends
- **Skills Used:** Python, SQL, Power BI, Statistics, EDA

Revenue Intelligence & Customer Retention Analytics

- Analyzed 100,000+ e-commerce transactions using Python & SQL to identify revenue drivers and customer retention patterns
- Performed RFM-style segmentation and purchase frequency analysis, uncovering that a small percentage of customers contribute the majority of revenue

CORE SKILLS

Data Analysis & Statistics
Data Cleaning
Exploratory Data Analysis (EDA)
Statistical Analysis
Data Visualization
Business Intelligence (BI)
Dashboard Development
ETL Processes
Data Pipelines
KPI Reporting
Data Interpretation

Technical Skills

- Python (Pandas, NumPy, Matplotlib)
- SQL (PostgreSQL, Joins, Window Functions)
- Power BI (Dashboard Development, KPI Reporting, DAX)
- Excel (Advanced formulas, Pivot Tables)
- Tableau (Basic)

Tools & Platforms

- Jupyter Notebook
- VS Code
- Git & GitHub

Additional Skills

- Data Pipelines
- Data Workflows
- Basic Machine Learning
- Problem-Solving
- Analytical Thinking

CERTIFICATIONS

- Data Analytics **TuteDude**
- Power Bi – **Simplilearn**
- SQL - **Simplilearn**
- Python –**Mimo**

- Conducted seasonal trend analysis and product category revenue ranking to optimize marketing focus
- Calculated key business metrics: Total Revenue, Average Order Value (AOV), customer lifetime value indicators

Skills Used: Python (Pandas, NumPy), SQL, Jupyter Notebook, Matplotlib/Seaborn, GitHub

Healthcare Sales & Returns Analysis

- Developed an **end-to-end analytics solution** for pharmacy sales and returns
- Cleaned and transformed healthcare datasets using SQL, improving data consistency
- Designed a **Power BI dashboard** highlighting top- selling drugs and departments
- Enabled data-driven inventory decisions and procurement optimization
- **Skills Used:** SQL, Data Cleaning, Power BI, Excel

Data Analytics & Visualization Virtual Experience *Accenture (via Forge)* Factory Downtime & Equality Analysis

- Built an interactive Tableau dashboard from raw JSON telemetry data across 4 global factories
- Created a calculated downtime metric that revealed the Osaka factory and Boiler machines as the top failure points
- Classified equality scores in Excel into Fair, Unfair, and Highly Discriminative tiers for workforce analysis
